ArcGIS Public Account

An ArcGIS Public Account is a personal account with limited usage and capabilities and is meant for non-commercial use only.

CREATE A PUBLIC ACCOUNT

If you have signed up for an Esri Account, you have automatically been given access to an ArcGIS Public Account and you can use the same sign-in credentials for both.

- Donated or discounted licenses: Education, Nonprofits, Conservation, Disaster Response <http://www.esri.com/esri-special-programs>
- If you work for an organization that already has an ArcGIS license, ask to see if you can obtain an organizational account

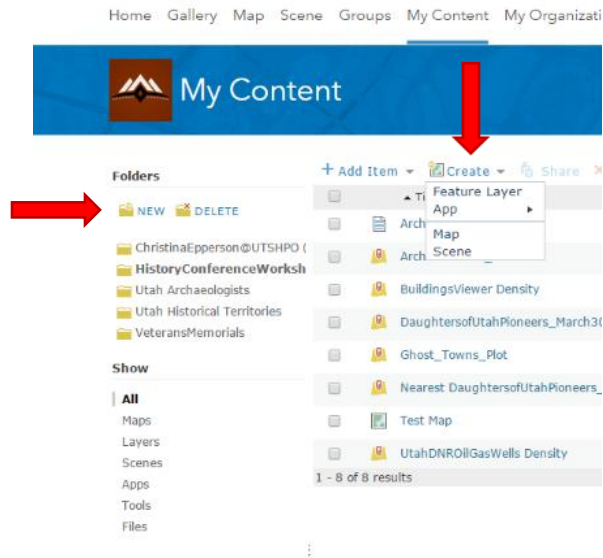

Paid Account Options:

- \$100 account <http://www.esri.com/software/arcgis/arcgis-for-personal-use>
 - You get:
 - ArcGIS for Desktop
 - ArcGIS Extensions (3D Analyst, Spatial Analyst, etc.)
 - ArcGIS Online Account
 - Noncommercial use only
- \$1500 ArcGIS for Desktop Basic license <http://desktop.arcgis.com/en/pricing/>
 - Includes ArcGIS Online account

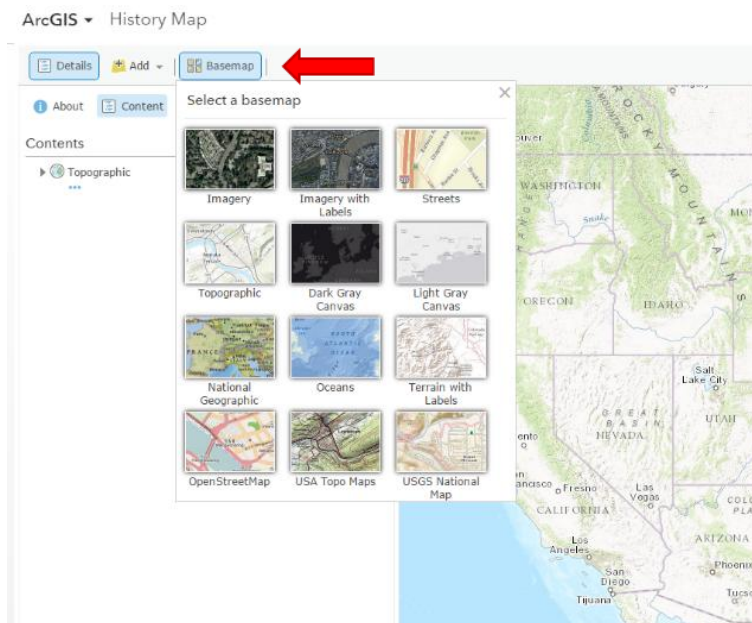

Create a Map

Base map

- Open **My Content** tab
- Select **New** under Folders (this helps you keep projects organized)
- Select **Create** and **Map**

- Fill out Title, Tags and Summary
- Select a Basemap (from Basemap or Add **Browse Living Atlas Layers**)

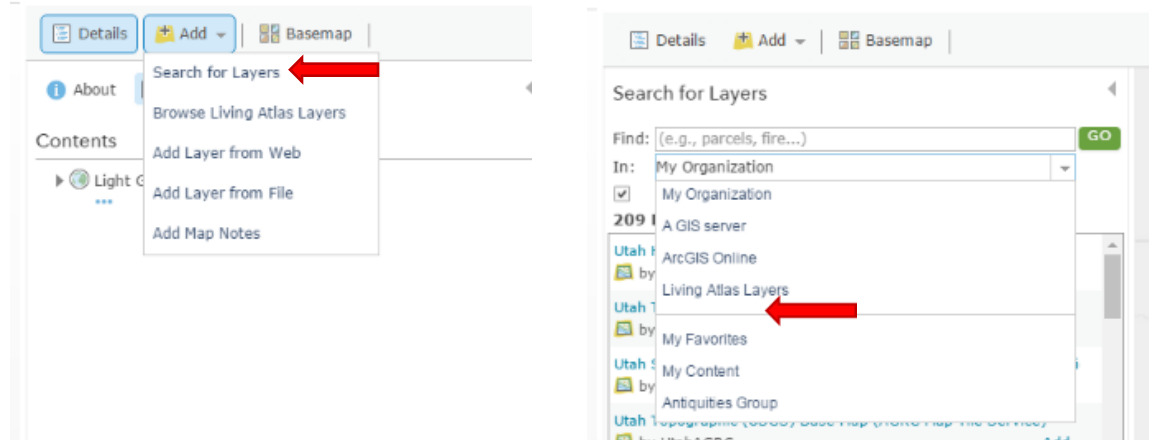

Well, Isn't that Spatial? : GIS Mapping of Historical and Cultural Resources
ArcGIS Online Tutorial

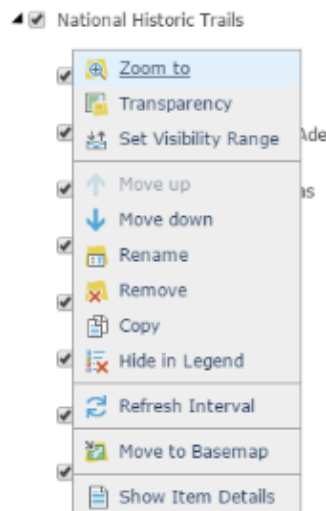

- Save Map (remember to do this periodically as you make changes to the map)

Add Online Data

- **Search for Layers / ArcGIS Online**
 - From the **Add** tab select **Search for Layers** and select **ArcGIS Online** from dropdown menu

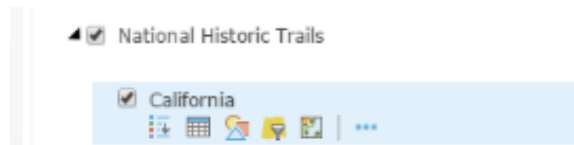

- In **Find:** as example, type in *National Historic Trails* then select **Add**
- Click on **Details** to return to list of contents
- Click on **Legend** to view symbology of your layers, then return to **Content**.

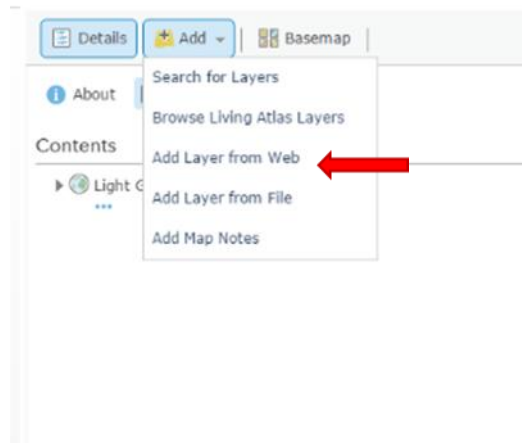

- Highlight layer with your mouse and click on **More Options** which looks like three blue dots ...

- In our example, the National Historic Trails has been pre-symbolized, so to change the style (color or width), each trail needs to be selected to make those changes.

Add KML file

- Select **Add** tab
- Select **Add Layer from Web**
- Insert the URL for the KML or KMZ file

OR...

- Open **My Content**
- Select **Add Item / From My Computer**
- Choose File / enter Title and Tag fields

Item from my computer ⓘ

Add an item from your computer.

File: No file chosen

Title:

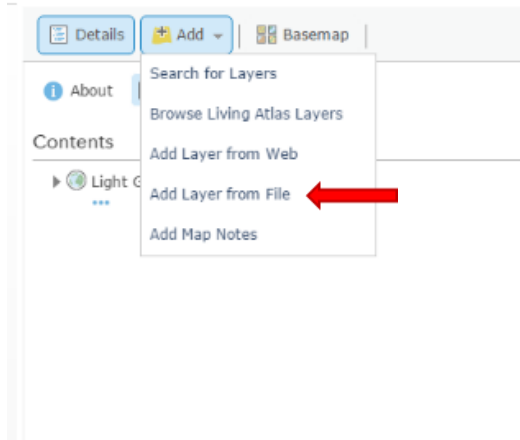

Tags:

***Note:** you will need to use this method for downloading KMZ data from the Utah Division of State History Data Clearinghouse website. Constraints with Wordpress only allow for us to post links as zipped files.

Add GIS shapefile

For files containing 1,000 features or less

- Select **Add**
- Select **Add Layer from File**
- Select **Choose File** (must be in .zip format)

OR...

- Open **My Content**
- Select **Add Item / From My Computer**
- Choose File / enter Title and Tag fields
- Must be in .zip format

For files containing 1,000 + features

Create a Hosted Feature Layer

Well, Isn't that Spatial? : GIS Mapping of Historical and Cultural Resources
ArcGIS Online Tutorial

- Must have publishing privileges / can only be done with organizational accounts!
- Open **My Content**
- Select **Create** tab
- Select **Feature Layer**

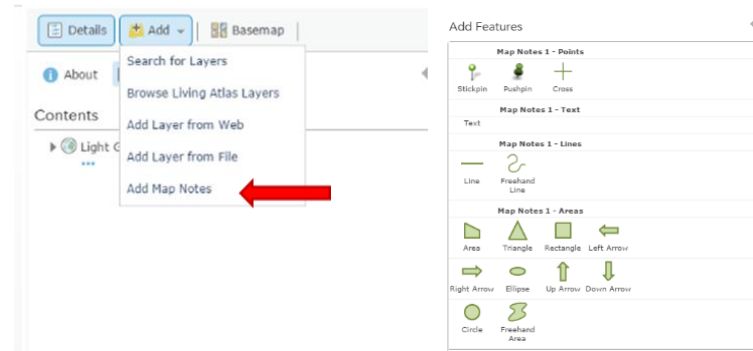

OR... You can split up your shapefile into different shapefiles (1,000 features each). This can be done in ArcGIS Desktop software.

Doesn't hurt to ask a GIS professional to do this for you. Start with the source of your data and see if they will accommodate you.

If you are concerned that this will mess up your map legend, remember, you can always hide layers from showing up in your legend.

Create your own data

- Select **Add**
- Select **Add Map Notes**
- Rename and select a template
- Map Notes is the default
- Point, lines or polygons can be drawn
- When you are done with **Edit** mode, toggle back to **Details**.

Don't forget to SAVE your changes!

Share Maps

Send a Link

- Select the **Save** tab before attempting to share your map.

Well, Isn't that Spatial? : GIS Mapping of Historical and Cultural Resources ArcGIS Online Tutorial

- Select the **Share** tab

Share

Choose who can view this map.

Your map is currently shared with these people.

- ☒ Everyone (public) 
- ☒ Utah Automated Geographic Reference Center (AGRC)
- ☐ Members of these groups:

☐ Antiquities

Embed this map

EMBED IN WEBSITE

CREATE A WEB APP

DONE

- Select **Everyone (public)** to share your map with anyone without an organizational account
- Copy the link provided (ex. <http://arcg.is/2bJrcRF>) and email. Link can also be attached to social media accounts (Facebook, Instagram, etc.) to reach a wider audience.
- You also have the option to embed the map directly onto your website.

Create a Web App

- Both Free and Paid Accounts can make web apps
- Select **Create A Web App** from the **Share** page
- Make sure the share setting is set to **Everyone (public)** for any maps used in the Web App of your choosing
